

Better Business for All

City of York Council's Public Protection service is committed to working in partnership with local business. We offer a wide range of advisory and regulatory based services to enable your business to reach its full potential, including:

PRIMARY AUTHORITY PARTNERSHIP

A Primary Authority Partnership is:

- a legally recognised partnership between a business and a local authority

where we:

- provide a single point of contact for local authority regulators
- audit and approve any work systems
- give you assured advice and legislation updates

Once established other regulators must contact us before taking enforcement action.

APPROVED GARAGE SCHEME (AGS)

Being part of the AGS will give:

- assurance to you on the quality of your garage or motor trade service
- assurance to potential customers about the quality of service they will receive from you

Once registered our trading standards officers will visit you to audit your business.

Once approved you will be included on the AGS website www.approvedgaragescheme.com that allows potential customers to choose your business from the list of AGS premises.

We will also help you resolve any customer complaints.

FOOD ADVICE

Are you a food business?

Are you happy with your current food hygiene rating score?

Would you like advice about how to maintain or improve your food hygiene rating?

We can help you by:

- sending an experienced officer to your premises before your next inspection to provide advice on how to maintain or improve your food hygiene rating.

We can also help with advice on:

- a range of food safety management systems
- food standards, including menu descriptions and allergens
- odour and noise control

OTHER CONSULTANCY

Our YES Consultancy team can also assist you in other areas including:

- noise, contaminated land, air quality and other related planning advice
- health and Safety at work

YES Consultancy

... is a consultancy which aims to improve lives by managing the environment in which people live, work or visit.
