Q22

Do you support or object to the proposed modification(s)?

Respondent skipped this question

Q23

If you object, please select your reason from the list below (select all that apply):

If you object, please select your reason from the list below (select all that apply).

Not positively prepared - i.e. strategy will not meet development needs

Not justified - i.e. there is no evidence to justify the modification

Not consistent with national policy - i.e. doesn't comply with the law

Q24

Please set out the reasoning behind your support or objection: Please note there is a 1000 character limit, therefore if your reason for support or objection is longer than this, please summarise the main issues raised.

My concerns are around permitting any future development on the land which contributes to increased flood risk in an area that is already vulnerable to flood. I am concerned that this step will open up the site to future development of the site which will see increases in car journeys. York has an ambition to be net zero by 2030. The Traffic Control Engineers report suggests that the schools current plans will lead to greater congestion in an area already congested by school traffic. I am concerned that this change of use will provide options for the school to increase in size. I would like to see the current traffic and air quality to be properly monitored. York has precious few green spaces. Green belt, particularly when it is close to the river should be preserved. This change of use is not consistent or justified.
